

I am writing because I strongly believe in telephone privacy. No one should call my house and offer me products or programs. They are a hassle and I am a busy person. If I need products or services, send me a flyer in the mail, if I am interested, I will call them. If I need any products or services from any company I will call them. I like the no call list, I don't think it should be weakened. If this is allowed to happen, further weakening of the no call list is possible. The people of Indiana do not want this.
